## DOCUMENTATION OF LAND USE PLAN CONFORMANCE AND NEPA ADEQUACY

NUMBER CO-110-2006-019-DNA

CASEFILE/PROJECT NUMBER (optional): TBD

PROJECT NAME: February 2006 Oil and Gas Lease Sale

LEGAL DESCRIPTION: See Attached

APPLICANT: BLM – Colorado State Office

ISSUES AND CONCERNS (optional): The entrance road to Dinosaur National Monument, and/or the scenic easement along side it, crosses parcel 3103. These lands are not open to leasing, and are not considered to be within the parcel being reviewed. They will not be included in any lease.

Lands within parcel 3093 are within the town limits of Dinosaur, Colorado. These lands support residential, commercial, and industrial uses, and should be deferred from leasing pending further analysis. They are not addressed in this document.

DESCRIPTION OF PROPOSED ACTION: The BLM proposes to sell oil and gas leases on 38 parcels of public lands/minerals comprising acres, in February of 2006. Fourteen of the parcels contain split estate lands with private surface overlying federal mineral estates. All parcels would be offered at public auction along with several other parcels in other jurisdictions. Following the auction any unsold parcels could be sold non-competitively. Each lease would be issued subject to stipulations identified in the White River ROD/RMP. These stipulations are specified in the attached parcel listing. Additional site specific analyses would take place upon submission of individual Applications for Permit to Drill.

LAND USE PLAN (LUP) CONFORMANCE REVIEW: The proposed action is subject to the following plan:

Name of Plan: White River Record of Decision and Approved Resource Management Plan (ROD/RMP).

Date Approved: July 1, 1997

X The Proposed Action is in conformance with the LUP because it is specifically provided for in the following LUP decision(s):

Decision Language: Make federal oil and gas resources available for leasing and development in a manner that provides reasonable protection for other resource values.

\_\_\_\_\_ The Proposed Action is in conformance with the LUP, even though it is not specifically provided for, because it is clearly consistent with the following LUP decisions (objectives, terms, and conditions):

#### REVIEW OF EXISTING NEPA DOCUMENTS:

List by name and date all existing NEPA documents that cover the Proposed Action.

Name of Document: White River Resource Area Proposed Resource Management Plan and Final Environmental Impact Statement (PRMP/FEIS).

Date Approved: July 1, 1997

Name of Document:

Date Approved:

List by name and date any other documentation relevant to the Proposed Action (e.g., biological assessment, biological opinion, watershed assessment, allotment evaluation, and monitoring report).

Name of Document:

Date Approved:

#### NEPA ADEQUACY CRITERIA:

1. Is the Proposed Action substantially the same action and at the site specifically analyzed in an existing document?

Documentation of answer and explanation:

Yes. Leasing and subsequent development of oil and gas resources are specifically analyzed in the PRMP/FEIS: see pages 3-3, 3-4, and Appendix D. With the exception of

certain formally identified Wilderness Study Areas, oil/gas leasing is provided for throughout the resource area, subject to stipulations and conditions of approval identified in Appendix A and Appendix B to the ROD/RMP. All lands considered in this action are open to leasing under the RMP. Stipulations specific to the lands considered for leasing are attached to this DNA

According to the Tenth Circuit Court of Appeals, site- specific NEPA analysis is not possible absent concrete proposals. Filing of an Application for Permit to drill is the first useful point at which a site specific environmental appraisal can be undertaken. (Park County Resource Council, Inc. v. U.S. Department of Agriculture, 10th Cir., April 17, 1987) In addition, the Interior Board of Land Appeals has decided that, “BLM is not required to undertake a site-specific environmental review prior to issuing an oil and gas lease when it previously analyzed the environmental consequences of leasing the land....” (Colorado Environmental Coalition, et. al, IBLA 96-243, decided June 10, 1999)

2. Was a reasonable range of alternatives to the Proposed Action analyzed in the existing NEPA document(s), and does that range and analysis appropriately consider current environmental concerns, interests, and resource values?

Documentation of answer and explanation:

Yes; five alternatives, covering a full range of oil and gas leasing options, were addressed in the PRMP/FEIS (see Table 1-1 of that document). No reason to identify and analyze additional alternatives for the lands involved in this proposal has been presented or raised, and these alternatives are considered to be adequate and valid for the proposed action.

3. Does the information or circumstances upon which the existing NEPA document(s) are based remain valid and germane to the Proposed Action? Is the analysis still valid in light of new studies or resource assessment information?

Documentation of answer and explanation:

Yes, the analysis in the RMP remains valid. Previous analyses were based upon a reasonable foreseeable development scenario that estimated the drilling of approximately 1100 wells, over the twenty year life of the plan (roughly 55 per year). To date, the average number of wells drilled has been very close to that number. Total disturbance was estimated at 10 acres per well (to include the pad, the road, and the pipeline). To date, the average disturbance per well has been approximately 5 acres. No land status changes have occurred, and no new site specific studies or resource assessment information has been received regarding any of the listed parcels that would preclude leasing in accordance with the existing planning documents and decisions made therein.

Portions of four parcels, containing approximately 1800 acres, are within areas proposed for wilderness by members of the public (Bull Canyon and Skull Creek). Additional information has been received regarding the possible wilderness (or other resource) related values. The information has been reviewed and found to not represent significant new information that would show that the action would affect the quality of the human environment in a significant manner or to a significant degree not already considered.

Previous sales of parcels in the vicinity of Dinosaur National Monument have resulted in comments regarding impacts on the visual resources. These impacts were adequately addressed in the White River Resource Area Proposed Resource Management Plan and Final Environmental Impact Statement (see pages A-26 and A-27 of that document).

4. Does the methodology and analytical approach used in the existing NEPA document(s) continue to be appropriate for the Proposed Action?

Documentation of answer and explanation:

Yes. The methodology and analytic approach used in the PRMP/FEIS are appropriate for the current proposed action. No new technologies or methodologies have been proposed or are warranted.

5. Are the direct and indirect impacts of the Proposed Action unchanged from those identified in the existing NEPA document?

Documentation of answer and explanation:

Yes. The anticipated direct and indirect impacts from oil and gas leasing/development are addressed in a resource-specific fashion in the PRMP/FEIS, based on a reasonable foreseeable development scenario that, to date remains accurate. The anticipated direct and indirect impacts of the proposed action are the same as those addressed in the PRMP/FEIS, and they were adequately addressed therein.

6. Are the cumulative impacts that would result from implementation of the Proposed Action unchanged from those analyzed in the existing NEPA document(s)?

Documentation of answer and explanation

Yes. The cumulative impacts of oil and gas developments, as well as other resource management actions, were addressed in the PRMP/FEIS based on a reasonable foreseeable development scenario, and has, to date, proven accurate. If implemented, the proposed action would not change this analysis, nor would it require new or additional analyses. The anticipated cumulative impacts of the proposed action are within the range of impacts analyzed in the PRMP/FEIS.

7. Is the public involvement and interagency review associated with the existing NEPA document(s) adequate for the Proposed Action?

Documentation of answer and explanation:

The public, interested groups, and other agencies, were fully involved in the development of the PRMP/FEIS.

**INTERDISCIPLINARY REVIEW:** Identify those team members conducting or participating in the NEPA analysis and preparation of this work sheet (by name and title).

The proposed action was presented to, and reviewed by the White River Field Office interdisciplinary team on 11/01/2005.  
Date

A list of resource specialists who participated in this review is available upon request from the White River Field Office.

<b>Name(s)</b>	<b>Title(s)</b>	<b>Area of Responsibility</b>
Michael Selle, Gabrielle Elliott	Archaeologist	Cultural Resources, Paleontological Resources
Lisa Belmonte Brett Smithers	Wildlife Biologist Natural Resource Spec.	Threatened, Endangered and Sensitive Animal Species, Wildlife, Migratory Birds, Wetlands and Riparian Zones
Chris Ham	Outdoor Recreation Planner	Wilderness, Recreation, Access and Transportation, Visual Resources
Nate Dieterich	Hydrologist	Air Quality , Soils, Water Quality, Surface and Ground Hydrology and Water Rights
Robert Fowler Melissa Kindall Mary Taylor Jed Carling	Forester Range Technician Range Mgmt Spec Range Mgmt Spec	Vegetation, Invasive, Non-Native Species, Forest Management, Grazing Management
Tamara Meagley Keith Whitaker	Natural Resource Specialist Natural Resource Specialist	Threatened and Endangered Plants Reclamation, Visual Resource Mgmt
Penny Brown, Linda Jones	Realty Specialist	Realty Authorizations

**REMARKS:**

*Cultural Resources:* While cultural properties could be identified on the lands proposed for lease, no site specific surveys have been completed. Prior to approval of any site specific permits, such surveys would be required. Any identified properties or sites would be avoided, or mitigated, prior to being disturbed.

*Native American Religious Concerns:* There are no known Native American Religious Concerns.

*Threatened and Endangered Species:* Several isolated areas which may support threatened or endangered species of plants and/or animals may be found in some of the parcels. However, these locations are protected by NSO stipulations developed in the Resource Management Plan.

*Water Resources:* Portions of the lands proposed for oil and gas leasing are situated in upland watersheds containing perennial streams and springs that support healthy riparian plant communities. To minimize the adverse impacts of oil and gas operations on these sensitive watersheds, no operations using chemical processes or other pollutants in their activities will be allowed to occur within 200 feet of any water bodies (including springs and seeps). In addition, all activities will be required to avoid riparian/wetland habitat.

MITIGATION:

See attached site specific Lease Stipulations derived from the White River RMP.

COMPLIANCE PLAN (optional): None

NAME OF PREPARER: Vern Rholl

NAME OF ENVIRONMENTAL COORDINATOR: Caroline Hollowed

DATE: 11/16/2005

## CONCLUSION

CO-110-2006-019-DNA

Based on the review documented above, I conclude that this proposal conforms to the land use plan and that the NEPA documentation previously prepared fully covers the Proposed Action and constitutes BLM's compliance with the requirements of NEPA.

SIGNATURE OF RESPONSIBLE OFFICIAL: Mary Taylor  
for Field Manager

DATE SIGNED:

Note: The signed Conclusion on this worksheet is part of an interim step in the BLM's internal decision process and does not constitute an appealable decision.
